

I am writing to you to express my opinion. I think the FCC needs to to stop pandering to the big companies and recognize that america's air waves belong to us, not big government, and certainly not just for the use of large corporations who just fatten your pockets with their lobby money. I am a huge satelite radio fan because it works and I understand that you are considering limiting their access to local weather ect and I write to you to ask you to stop meddling. Allow satelite radio to continue to offer it's service, for it far outseeds that of regular radio and I am offended that once again the dirt of greedy big goverment thinks that it can step in the way. Allow satelite radio to provided both local traffic and weather because it is fair, and that is what goverment is suppose to do, make things fair. For once, listen to the people and not just the green backs.
